

Dentist's gets a face lift!

There are exciting developments in Abbey Road just North of the Abbey Road zebra crossing of Fab Four fame.

Just walk along the leafy road towards the hubbub of the restaurants and niche shops near Boundary Road and you will see at number 81 a lovely aqua coloured door which is the entrance to the fabulous newly refurbished family dental practice of Diana Spencer.

Diana took an existing practice, and with a lot of imagination and some great ideas from Charlotte Heather, a local interior designer, has created a calm and welcoming family practice.

When asked about her ideas behind the changes, Diana said "I wanted to create a warm, welcoming and relaxing Dental surgery with all the facilities expected of a 21st century dental environment. Obviously computers, but also the latest dental technology and equipment makes sense. I have many years' experience as a dental surgeon having owned a practice in Islington for nearly

20 years. My philosophy of care is that the visit to a dental practice should be enjoyable and that prevention of disease and maintenance of dental health is paramount".

Diana offers a fully comprehensive dental service including tooth whitening, where the team has great expertise, cosmetic dentistry and most especially general and children's dentistry with an emphasis on the care of nervous patients. Her ethos is to offer calm and considered approach to the art of dentistry in a practice that is welcoming and an oasis of relaxation more akin to a spa than a dental surgery.

At Abbey Road Dental the staff are highly trained and understanding. Agnieszka, the welcoming receptionist can answer any queries and arrange appointments to fit in with patients' busy schedules. Penny oversees the clinical areas ensuring that all hygiene and decontamination protocols are fulfilled and works with Diana in the surgery.

Abbey Road Dental are especially proud to announce that the team is also joined by Melonie Prebble, dental hygienist and therapist and national speaker in the dental field with over 20 years experience. Her key strengths are in the focus on treatment of periodontal (gum) disease, and preventive care programmes especially for children

Melonie is also an expert on teeth whitening. The practice uses the most up to date whitening system which offers fast, safe and gentle whitening with a low sensitivity formulation.

Diana says "Abbey Road Dental is a lovely environment which is ready to welcome new patients. Now is the time, with the spring finally appearing, to treat yourself to a full dental check up, sort out any problems and have the peace of mind and confidence that comes with a healthy sparkling smile!"
